

# Welcome to Canton Car Wash, Baltimore's Premium Car Wash.

With our soft touch cleaning system, multiple waxes and protectants, we keep your car clean and protected with the highest quality wash. And we keep the environment green with water recycling and re-use tanks that minimize clean water and chemical use. Our 90-foot wash tunnel with state-of-the-art equipment and our 9-bay detailing center were designed to get you in, out and on your way quickly. Fast, clean and green - and all at a great value.

## Our 5 Green Pillars

### water conservation

We use new foam and micro-fiber soft touch cleaning systems. Soft touch is more efficient and provides a superior wash over the old touchless washes that use exorbitant amounts of water and require higher and harsher chemical concentrations. About 80-90% of our car wash water is recycled.

### reduced waste

We use only biodegradable detergents that are APE, NPE and Phosphorus Free and VOC compliant, so they keep our cars clean and our air and water healthy. We stay away from the harsh acids used by many other car washes to clean a car's rims.

We use recycled products wherever possible - in fact, 30% of the 4,200 sq. ft. detail building is constructed of recycled material.

### reduced urban footprint

A large portion of our total area is green space, planted with indigenous Chesapeake Bay plants that absorb potentially harmful runoff, allow rain water to return to the underground aquifers, and enhance the overall feel of the community.

### economic incentives

Sometimes it takes a little green to motivate people to be more eco-conscious. We offer "Half-off to Hybrids" discount that rewards people who buy eco-friendly cars.

### reduced energy consumption

Unlike touchless washes, soft touch doesn't require heating water, offering tremendous energy conservation. Our green technology extends beyond the wash tunnel. Our building is equipped with tankless hot water heater, automatic light sensors, low-E glass, solar shading and more.
